(Just North of Target)

Why should I choose Fry Information Technology?

“I have a fortune invested in computers and they just sit there!”

We all know that the computers we own are capable of doing much more. Fry Information Technology can help you raise that level of utilization and performance. We want to be your IT staff. A staff where you only pay for what you need.

“I spend too much of my time hauling equipment back and forth to the shop”

All services can be performed at your business. When you experience a problem a simple phone call will be all you need to do to get it corrected. Let us take it from there. This will free you up to concentrate on your business, not to change roles and be a computer programmer.

I have been burned so many times that I am forced to try and learn all these technologies myself.

This is probably the most common complaint. Our stated goal is honesty and integrity. We will always suggest the best solution at the best price. We want to keep you as a customer.
